

CAN YOU AFFORD to be handling cash?

Customer satisfaction is the number one priority for any successful business, but it's often the most difficult to achieve. Keeping staff front of house while reducing back office tasks is critical in that process. Spending less time clearing, counting and reconciling cash allows them to spend more time face-to-face with your customers.

Banktech has been actively consulting with some of the industry's leading club and pub groups and found that venue managers need a fast, accurate way of handling and tracking cash movement.

Banktech has met these needs with the development of our new line of DepositConnect cash recyclers. Designed in conjunction with Hitachi, DepositConnect recyclers include proprietary software to help you improve your cash management, while also generating an audit trail of your cash.

Banktech's C1 note recycler is capable of holding up to 12,200 notes, allowing you to bunch feed up to 200 notes at a time with escrow. The larger C2 note recycler has no escrow, allowing for a continuous note feed of up to 16,400 notes. Both machines can be combined with Banktech's new coin recycling module, which is capable of holding up to 7850 coins.

DepositConnect's proprietary software lets you pre-load ATM, CRT, TAB and bar floats, as well as create customisable access and authority levels, allowing your staff to collect their individually approved floats at the start of their shift and deposit them into the recycler when they finish. The banking withdrawal function also allows your cash-in-transit (CIT) provider to have their own access to collect banking.

Henry Kiwarkis, Banktech General Manager – Sales

DepositConnect can transform the way your business handles cash. With staff no longer required to count cash for floats or gaming clearance, your venue's labour costs will be immediately reduced. You'll also be able to have peace of mind knowing that large amounts of cash are securely locked away inside a secure UL291 CIT-rated safe.

DepositConnect, like all Banktech devices, is supported by their 24/7 help desk and field service team. It can also be connected to their OmniVision web portal, generating real-time reporting and analytics for all your Banktech devices.

'The installation of Banktech's C2 cash recycler has made an enormous difference to our business. Our gaming clearance is counted and securely stored faster than ever before. It gives us complete tracking of all cash in and cash out and allows us to manage authority levels and access of individual staff,' says Ken Morgan, Manager at Berala Hotel.

'The speed of the cash recycler, combined with the accuracy of note quantity, has allowed us to significantly reduce the cash float required to run our business.

'Our cash is safely stored, and accurate balances are easily obtained without having to open a safe. We are in full control of all our cash, all the time, and no longer have to physically count and reconcile a two-key safe,' says Morgan. **C&PM**
