

Turn the Cost of Cash Handling into Cash Saving

Banktech's new cash recycler helps pubs and clubs cut the real cost of cash handling while tightening security and control.

Every venue spends more on cash handling than they realise – in extra staff hours, recounts, variances and investigations. Banktech's latest cash recycler automates how cash is counted, secured and tracked, so you can clearly see where you're **saving time and money**, and where your risk has gone.

Where cash handling is costing your venue:

- ✗ Staff tied up for hours in time consuming, manual counting and balancing
- ✗ Variances and "missing" cash that take days to chase down
- ✗ Multiple people handling large amounts of cash in safes, tills and back rooms
- ✗ No simple way to see the true cost of manual cash handling

How will Banktech's cash recycler help:

- ✚ Takes over the slow note counting and sorting that staff describe as frustrating
- ✚ Locks cash away as it's counted, with a clear record of who accessed what and when
- ✚ Reduces counting errors in the cash handling process – both dispensing and returning floats
- ✚ Produces accurate end of day figures your leadership can trust
- ✚ Frees staff to return to duties on the floor sooner, instead of chasing errors

CashRecycler

Secure Smart-safe Solution

Return on investment made clear

- Venues typically see a **positive return on investment** in 12-14 months
- Savings come from **fewer hours** on cash handling, less overtime and **less time** spent on issues

Less worry, more control

- **Cash is locked away as soon as it's counted** – not sitting loose in tills or bags
- Every transaction leaves a digital fingerprint, making it harder for **cash to quietly disappear**
- When something doesn't add up, the audit trail of cash flow during clearance and reconciliation gives finance **visibility and peace of mind**

Features that help a venue run more efficiently:

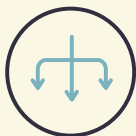

High speed automated counting & sorting

Mixed notes are counted and sorted quickly and accurately, reducing manual work and errors.

Secure Level 1 safe with controlled access

Cash is locked in a rated safe, with access controlled by PIN, RFID or biometrics, so you decide who can withdraw and when.

Individual float preparation

Prepare and recycle cash into individual till floats, saving supervisors' time and reducing mistakes.

Full audit trail

Every deposit and withdrawal is recorded, so it's easier to find and fix discrepancies when they occur.

Ready to see what your venue could save?

Talk to Banktech about how a cash recycler could reduce your time consuming cash handling, tighten control and give your leadership more confidence. **Call 1800 08 09 10 or email sales@banktech.com.au** to discuss your venue and request a tailored ROI calculation and demonstration.
